

Quick Start Guide

Getting started. This quick start guide provides the highlights most users need for a basic configuration. Refer to your User Guide or visit www.junxion.com/support for further help.

1. Insert your data card into the Junxion Box.
2. Power up the Junxion Box. Wait two minutes for the Junxion Box to initialize. The status light should be solid red.
3. Connect your computer to the Junxion Box using the crossover Ethernet cable that was included.

For advanced configurations (or if you are using a carrier other than Sprint, AT&T or Verizon) access the Device Manager with a web browser at 192.168.2.1/admin. The default username is "admin" and password is "junxion".

Updates. Junxion periodically releases new firmware and revised User Guides. Download the latest at www.junxion.com/support.

Registration. Please register at www.junxion.com/register to ensure your Junxion Box is set up for warranty and support.

Field Commander. Junxion's Field Commander™ remote management solution allows you to monitor, configure, and update an entire Junxion Box deployment from a single secure web interface. For details, visit www.junxion.com/fieldcommander
